

Devendra Verma

Bhopal, India | +91-6260223528 | devenverma145@gmail.com | LinkedIn | GitHub |

Education

Integrated M.Tech – Computer Science (AI & ML)

VIT Bhopal University

CGPA: 8.06/10

Technical Skills

Languages: Python, Java, HTML, CSS, JavaScript

Frameworks: Bootstrap, Node.js, WordPress

Developer Tools: Git, GitHub, VS Code, PyCharm, Chrome Developer Tools

Libraries: pandas, NumPy, OpenCV, TensorFlow

Concepts: OOP, Data Structures & Algorithms, MVC, API Integration

Experience

Website Development Intern | AK Infosoft Pvt. Ltd.(Remote)

Oct 2025 – Dec 2025

- Developed and maintained responsive web interfaces using HTML, CSS, JavaScript, Bootstrap, and jQuery.
- Customized and managed websites using WordPress and WooCommerce, improving functionality and usability.
- Wrote clean, optimized, and well-documented code following industry best practices.
- Performed debugging and troubleshooting to enhance website performance and reliability.
- Collaborated in team meetings and code reviews, contributing to feature design and problem-solving.

Projects

Panoptic Image Segmentation for Lung Disease | Python, Deep Learning, Computer Vision, Medical Imaging

- Designed a panoptic image segmentation framework to segment lung regions and disease-affected areas from medical images.
- Implemented deep learning-based semantic and instance segmentation models for accurate pixel-level analysis.
- Applied medical image preprocessing and data augmentation to improve model robustness and generalization.
- Trained and evaluated models using standard performance metrics to ensure reliable segmentation results.
- Utilized segmentation outputs to support early analysis and interpretation of lung diseases.

Face Recognition-Based Attendance System | Python, OpenCV, Machine Learning, Computer Vision

- Developed a face recognition-based automated attendance system using computer vision and machine learning techniques.
- Implemented real-time face detection and recognition using OpenCV to accurately identify individuals.
- Applied image preprocessing and feature extraction techniques to improve recognition accuracy and system reliability.
- Integrated the recognition module with an automated attendance logging mechanism, reducing manual intervention.
- Evaluated system performance on multiple datasets to ensure robustness, scalability, and consistent accuracy.

Achievements / Certifications

- Cloud Computing(NPTEL)** - Cloud architecture, virtualization, and service models.
- AWS Technical Essentials(Amazon Web Services)** - Hands-on training in AWS core services and cloud infrastructure..
- Applied Machine Learning in Python(University of Michigan, Coursera)** - Practical implementation of ML algorithms using Python libraries.
